SUMMARY

A Full Stack Developer with over 4 years of experience in building web applications. Over the years, I've worked closely with different teams to turn ideas into features that people genuinely use and appreciate. People know me as someone who's technical, analytical and communicates clearly, and I genuinely enjoy figuring out the 'why' behind problems before diving into solutions. For me, the best part of being a developer is seeing a small concept turn into something real that people find valuable.

EXPERIENCE

Weatherford Fullstack Developer	Jun, 2023 - Present Mumbai, India
<ul style="list-style-type: none">Designed and developed complex modules for a large-scale SaaS web application, utilizing Angular 14+ to create dynamic, responsive user interfaces that enhance the user experience and ensure seamless interaction with the backend.Automated backend utilities in C#, reducing processing time by 70%, which significantly improved system performance and task execution speed for end users, resulting in reduced manual effort and faster turnaround time.Developed and optimized RESTful APIs in C#/.NET, enabling seamless integration with Angular frontend and ensuring scalable, maintainable solutions.Led a UI theming transformation by redesigning the application's CSS architecture, implementing multiple modes such as Dark and Light themes, which enhanced maintainability, visual consistency, and user experience across the platform.Mentored and onboarded 3+ junior developers, providing continuous guidance, task reviews, and support to enhance team productivity.Collaborated with product managers and designers to refine requirements, ensuring final features met user needs and business objectives.Maintained an average sprint completion rate of 90%+, consistently meeting project deadlines and deliverables.Successfully delivered 100% of planned features for 6 consecutive releases, ensuring alignment with business objectives and stakeholder expectations.	
Capgemini Software Developer	Jul, 2021 – Jun, 2023 Mumbai, India
<ul style="list-style-type: none">Built a Fintech web application from the ground up using Angular 12 to design the frontend and .NET WebAPI for developing the backend, for managing financing and loan processing for a client.Led design and delivery of an Attendance & LMS system as a product owner and team lead, managing a team of 6, aligning features to stakeholder requirements, and increasing employee satisfaction by 20%.Collaborated with clients, business analysts, QA, and UX teams to gather and refine requirements, translating them into user stories and actionable tasks.Contributed to API design and integration for scalable, loosely coupled services aligned with microservices architecture principles.Enforced coding standards and conducted thorough code reviews, decreasing production defects by 40% and enhancing code quality.	

SKILLS

Technical: Angular, TypeScript, C#, Python, .NET, SQL, HTML, CSS, Bootstrap, Numpy, Pandas, Prompt Engineering, Microservices Architecture, SOLID Principles
Tools: Figma, Postman, Git, Perforce, Swagger, Power BI
Methodologies: Scrum, Kanban, Retrospectives, Refinements, Sprint Reviews
Product & Business: Requirement Analysis, Problem Scoping, User Empathy, Agile Sprint Planning, Cross-functional Collaboration, Stakeholder Management, Product Strategy Fundamentals

EDUCATION

University of Mumbai Bachelor of Engineering - Computer Engineering	Jul, 2018 - Jun, 2021 GPA: 9.26/10.0
Government Polytechnic, Mumbai Diploma - Computer Engineering	Jul, 2015 - Jun, 2018 Percentage: 85.06%

CERTIFICATES

Data Science Certification - Coursera 	2020
Microservices Architecture – The Complete Guide 	2025
Product Manager Fellowship - NextLeap 	2025
